

ABC ORANGE WASH

ABC Orange contains no aromatic or chlorinated solvents and is therefore less harmful to both human health and the environment. It is not classified as flammable making handling and storage safer and because of its very low odour is more pleasant to use.

ABC Orange Wash has been tested and approved by FOGRA according to evaluation criteria as specified by Heidelberg, MAN Roland and Baldwin.

- For use with sheet fed and web applications
- Water miscible, for addition economy it can be mixed with up to 25% water without reducing its cleaning action.
- Cleans quickly and thoroughly
- Reduces blanket tack
- Prevents oxidation and swelling of the rubber
- Maintains ink receptivity of rollers and blankets
- Compatible with most negative/positive printing plates

DIRECTIONS FOR USE

Rollers: Apply either neat or mixed with water directly to inking rollers, allow to run in before applying wash-up blade. Follow up with a water wash for thorough removal of all residues.

Blankets: Apply either neat or mixed with up to 25% water using a water damp cloth to remove all ink and water soluble material. Buff down with a clean, water damp cloth before starting press.

For automatic systems use undiluted
