

5 STAR FOUNT

5 Star Fount is a specially formulated fountain solution for use on all litho presses whether web or sheet fed, large or small. 5 Star Fount is a super-concentrated solution therefore much smaller dosages are required compared with conventional fountain solutions. It requires no further additives to produce excellent results.

PRINCIPAL FEATURES

Super concentration: The normal dosage of 5 Star Fount is a quarter or even less compared with conventional fountain solutions.

Compatibility: 5 Star Fount can be used successfully with all types of inks (including UV) and all types of metal plates. It is non-toxic and can be used in food packaging.

Wetting Agents: 5 Star Fount includes powerful wetting agents which enable it to run with less water and where applicable less alcohol

Ink Drying and Blanket Tack: It contains agents that speed ink drying and reduce blanket tackiness.

Improves Print Quality: 5 Star Fount gives quicker start-ups, prints sharper half tones and reversals, gives denser solids and reduces paper waste.

Other: 5 Star Fount contains agents that help to prevent metal corrosion, mould growth and foaming.

Directions For Use:

For general use mix between 3 - 5 mls of Five Star Fount per litre of water.

For use in auto-metering systems, it may be pre-diluted with 3 parts water and used at between 20-40 mls/litre of water
