

EVERYDAY PLATE CLEANER EXTRA

Everyday Plate Cleaner Extra is an acidic, general purpose plate cleaner for use with both positive and negative presensitised aluminium plates. It has a high solvency to rapidly remove ink and scum whilst at the same time desensitising scratches and improving the hydrophilic properties of the non-image areas. Everyday Plate Cleaner Extra will provide protection during short press stops and can be used as a starter for both new and stored plates.

- High solvency
- Gum Arabic based
- Removes scum, oxidation and scratch marks
- Strengthens image
- Improves hydrophilic properties of non-image
- Provides protection during press stops
- Contains effective corrosion inhibitors

DIRECTIONS FOR USE

Shake well before use. Apply directly to the plate surface using a damp sponge or wipe, applying sufficient pressure to remove any ink. Wash off with water or fountain solution before restarting the press.
