

WHITE LABEL WASHOUT

White Label Washout is a synthetic gum based, dual purpose plate cleaner and storage gum. When used as a plate cleaner, White Label Washout will remove ink from the plate and simultaneously desensitise the non-image areas. White Label Washout can also be used as an alternative to gum arabic for short to medium term plate storage.

- Improves the ink receptivity of the image areas
- Can be used with most presensitised aluminium plates
- Provides excellent desensitising properties
- Allows immediate startup after short stops or storage
- Removes ink and gums the plate in one application
- Contains no abrasives

DIRECTIONS FOR USE

Shake well. Apply White Label Washout to the plate with a clean, damp sponge or cloth and gently rub over the entire surface of the plate. If storing the plate, buff down to a thin, even film and allow to dry.
